EDUCATION

G H Patel College of Engineering and Technology

B.Tech, Information Technology

May 2026

CGPA: 8.60/10

EXPERIENCE

ML Intern

Jan 2026 – Apr 2026

Thick Code

- Led model development on a 4-person team building a stock forecasting platform benchmarking ARIMA, Prophet, and LSTM models (full technical details under Projects below).
- Applied core ML and data science foundations – NumPy, pandas, and applied statistics/probability – to iterative, hands-on project work.
- Independently designed and delivered **8+** applied ML projects on biweekly deadlines, translating new concepts into working code under a fixed delivery cadence.

Full Stack Web Developer Intern

May 2025 – Jun 2025

Gleamoro

Bhavnagar

- Built and owned an authentication/user-management REST API in Node.js on a 3-person team, deployed via Docker on Linux; reduced API response latency by an estimated 30% through query optimization and connection pooling.
- Integrated React/Redux frontend with the authenticated API; diagnosed and fixed a race condition in concurrent requests, improving reliability under load.

PROJECTS

Stock Market Forecasting Dashboard | *Flask, TensorFlow/Keras, statsmodels, pmdarima, scikit-learn, SQLite* Jan 2026 – Apr 2026

- Led model development on a 4-person team benchmarking ARIMA, Prophet, and LSTM on **~1,256** daily observations across multiple tickers; LSTM achieved the lowest error (**RMSE 2.89, MAE 2.23**), outperforming ARIMA by **8%** and Prophet by **30%** on RMSE.
- Built a preprocessing pipeline with ADF stationarity testing and seasonal decomposition; evaluated the accuracy/cost trade-off of LSTM's **12x** longer training time (145.6s vs. ARIMA's 12.3s) to inform model selection.
- Implemented SQLite-backed multi-user authentication for the Flask web application.

AI Medical Assistant – Medify | *React Native, Flask, MongoDB, OpenCV, IBM Watson*

Jun 2025

- Owned the OCR and backend ML pipeline (4-person team, **Top 25/500 Finalist**, CVMU Hackathon) for a cross-platform React Native app, achieving **90%+** accuracy extracting medicine names, dosages, and handwritten instructions.
- Compiled a **200K+** medicine database enabling fast search of drug info, side effects, and alternatives.
- Built AI-driven medical report summarization with doctor-sharing, plus a smart medication tracker with automated reminders.
- Integrated an IBM Watson chatbot for real-time patient assistance.

Phishing Website Detection | *Django, React, XGBoost, scikit-learn*

Jan 2025

- Deployed and explored a full-stack phishing URL classifier (Django + React) using a pre-trained XGBoost model, extracting **15** URL-based features.
- REST API returns phishing/legitimate predictions in **under 1 second**.

SKILLS

- Languages:** Python, SQL, C/C++, Java, JavaScript
- ML & Data:** Deep Learning, Neural Networks (LSTM), Pandas, NumPy, Scikit-learn, TensorFlow/Keras, statsmodels, pmdarima, Matplotlib, Seaborn, Plotly, OpenCV
- Backend & Web:** Flask, Django, React, Node.js, REST APIs, MongoDB, MySQL, SQLite
- Cloud & Tools:** AWS, Docker, Git/GitHub, Postman, Jupyter, Figma

ACHIEVEMENTS

- Top 25/500 Finalist**, CVMU Hackathon – built Medify, an AI medical assistant app
- Secretary**, ISTE GCET Student Branch – organized technical events and managed member operations
- Winner**, Best Business Idea Contest, CVM University

EXTRACURRICULARS

- AWS Academy Graduate** – Cloud Developing (AWS Academy / Coursera)
- Data Science Bootcamp** (2022) – Attended and worked on multiple projects
- Branch Representative, ISA Club** (2023–2025) – Organized events and contributed to community outreach initiatives
- Member, Rotaract Club** (2022 – Jun 2026) – Coordinated events and supported local communities
